On 16 December 1952, a conference was held by representatives of the SCC, the Uebigau Shipyard, and the Berlin Designing Office at the Projecting and Designing Office of the Schiffbau VEB in Berlin-Koepenick. The meeting was held for the purpose of discussing the construction of floating docks at the Uebigau Shipyard and their transfer, in sections, from the yard to the coast by water. The Berlin Designing Office has contacted the Generaldirektion Schifffahrt (Directorate General, Shipping) for information on the largest admissible dimensions for waterway shipping.

Comment. It is believed that the constructions were floating cranes, rather than floating docks, since some pontoons for floating cranes were scheduled to be built at Uebigau.
